Strengthening Families  
Since 1991*

# WE HAVE A PROGRAM FOR YOU

## COUNSELING & PSYCHOTHERAPY

Counseling services are offered both in the home and in office-based settings for children and their families, adults, and groups by our licensed counselors. We make every effort to understand and address the context within which each client lives and operates. Counseling helps clients expand their worldview and their options for dealing with recurring patterns of distress.

## GROUP COUNSELING

Group counseling is a unique experience that builds interpersonal skills, communication, and trust while learning to monitor and manage our equilibrium with greater independence and respect for social expectations. In a group setting, we address the many issues of autonomy that children can find challenging – impulse control, social skills, peer relationships, and more.

## INTENSIVE FAMILY-BASED THERAPY (IFI)

The intensive family-based therapy program is especially designed for children and their families who are experiencing prolonged distress and crisis situations. This service is conducted in the home and intended to strengthen and stabilize the family system and home environment while preventing potential out of home placements such as hospitalization. Intensive Family-Based Therapy also helps children who are re-entering the home environment from a higher level of care.

## BEHAVIORAL AIDE SERVICES

Our bachelor degreed behavioral aides teach children self-regulation skills that promote resiliency, maturation, and self-awareness as their life unfolds. Behavioral Aides also empower adults and family members to take charge of their future by giving them tools to advocate for themselves and to become proactive in solving problems.

## SCHOOL BASED SUPPORT

Pathways Transition Programs has a strong relationship with many area schools where we work in collaboration with teachers and parents. We believe children's behaviors that are challenging in a classroom actually reflect deficits in self-regulation. Shame and punishment-based approaches compound the problem and make change more difficult. Our interventions focus on enhancing self-management skills while addressing the classroom problem.

## PSYCHIATRIC SERVICES

Board certified child psychiatrists provide consultation and medication management for children, adolescents, and adults. All physicians and nurses work in close collaboration with our clinical counseling staff.

## DIAGNOSTIC & ASSESSMENT SERVICES

We offer comprehensive behavioral health assessments for children and adults that offer both a formal diagnosis and an understanding of the individual's strengths and needs as they confront life challenges. Additional evaluations are offered on parenting beliefs, domestic violence, and substance abuse.

## DFCS & DJJ STATE CONTRACTED PROVIDER

Pathways Transition Programs is a Department of Children and Family Services Wraparound Service Provider. These services include *Homestead, Behavioral Aide, Early Intervention, Prevention of Unnecessary Placement*, and *Comprehensive Child and Family Assessment*.

Pathways Transition Programs is also an approved Department of Juvenile Justice Provider for *Wraparound Service, Expedited Service*, and *The Seven Challenges Program*.
