The best description of the Pathways approach to therapy is the Kaleidoscope. When you look into the tube of a kaleidoscope, it has a definite pattern, and if you stay frozen, never move, it seems to be the only pattern possible. But a little movement, and voila! — everything looks different! The pieces are the same, but all of a sudden, they form something new.

Transition Programs, Inc.
Private Practice Clinicians
COUNSELING & PSYCHOTHERAPY
We believe every person makes the best adjustment to life circumstances within the range of options they believe they have, and that these options are only limited by their view of the world and how to meet their needs and feel safe in it. Counseling helps clients expand their worldviews and their options for dealing with recurring patterns of distress.

PSYCHIATRIC SERVICES
Our medical director, a board certified child psychiatrist, provides consultation and medication management for children, adolescents, and young adults. She leads a team of medical professionals and works in close collaboration with our clinical counseling staff.

GROUP COUNSELING
Group counseling is a unique experience that builds interpersonal skills, communication, and trust. In a group setting, we address the many issues that children and adults can find challenging – impulse control, social skills, relationships, and more.

DIAGNOSTIC & ASSESSMENT SERVICES
We offer comprehensive psychological evaluations for children and adults that include both a formal diagnosis and an understanding of the individual’s strengths and needs as they confront life challenges. These include assessment on cognitive abilities, academic achievement, neurological deficits, learning disabilities, personality styles, and emotional experience.

Our own comprehensive behavioral, personality, emotional, and cognitive function assessment process is founded in our belief that individuals and families must be understood in the context of their lives. Symptoms and presenting problems are best addressed and relieved when we understand them as an individual’s attempts to meet the demands of their lives.

TRAINING & CONSULTATION
We offer training and consultation to agencies serving similar clients, and workshops for parents, teachers, and other professionals who touch the lives of children and families.

OUR MISSION
- View children’s behavior and emotional difficulties as their efforts to meet their fundamental need for connection and mastery.
- Help parents and educators understand children’s psychological needs and to correct problematic behaviors in non-shaming and self-regulation-promoting ways.
- Train professionals to be sensitive to the damaging impact of adverse childhood experiences and how to utilize the strengths and resources of children and their families to promote lasting change.
